

Mini Barns

We Have The Best Prices Period!

Mini Barns

The 4' sidewall "Mini Barn" is a very economical building. It is our lowest profile building. It is also our lowest priced building per square foot. If you don't need overhead storage or a lot

of wall space, this may be the building for you. All 4' sidewall "Mini Barns" are available with all of our options; although, the loft may not be very practical due to the lower overall height of these buildings.
